WEEKLY

REGIONAL ICS - prepared for and participated in the NIMS Integration Team (NIT) conference call. Topics included discussion of regional report outs, KLP courses needed in the next five years, and the final draft version of the Incident Management Handbook.

BIOWATCH - traveled to Houston to attend their BAC Meeting. Begin compiling information for the quarterly report needed by EPA HQ. Continued to coordinate with START on current and planned activities.

WESTBANK ASBESTOS - completed final map and description of the Johns-Mansville facility and landfills in Marrero, Louisiana. Hopefully, this is the last request by the RP before finalizing the cost recovery agreement.

RAB VALLEY - continued to assist Region 6 recovery team with entering into process of negotiation of cost recovery with the RP, Joslyn.

CORE NAR - compiled, completed and submitted assigned Elements for the CORE NAR evaluation.
